# 1. Display Number of Docs on Folder

When selecting a folder on the documents page, the current number of documents in each folder will be displayed.

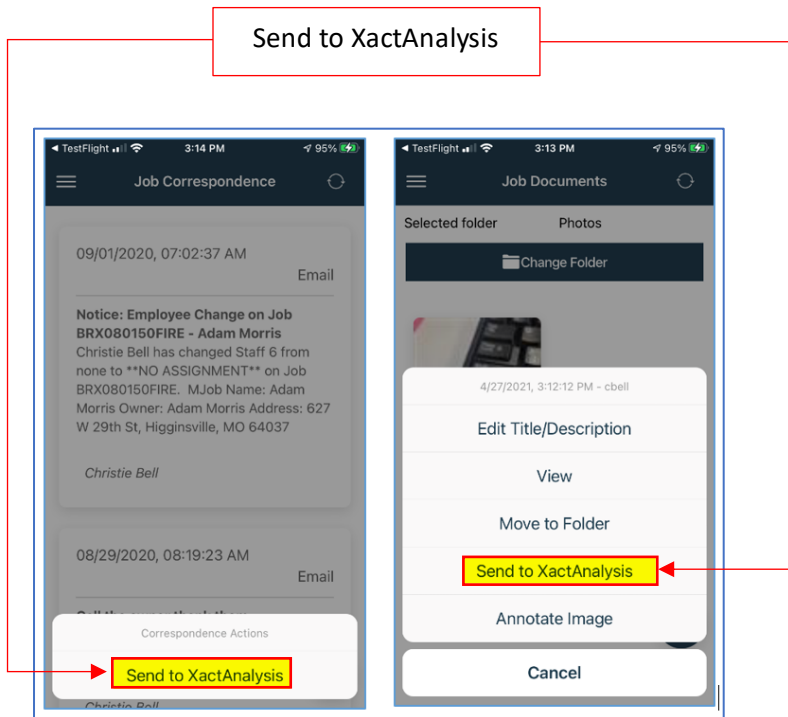

## 2. XactAnalysis User Permissions for Correspondence

With the correct permissions and loss types, Managelt Mobile Users can send documents and correspondence to XactAnalysis.

Users can send Restoration Manager Documents and Pics to XactAnalysis.

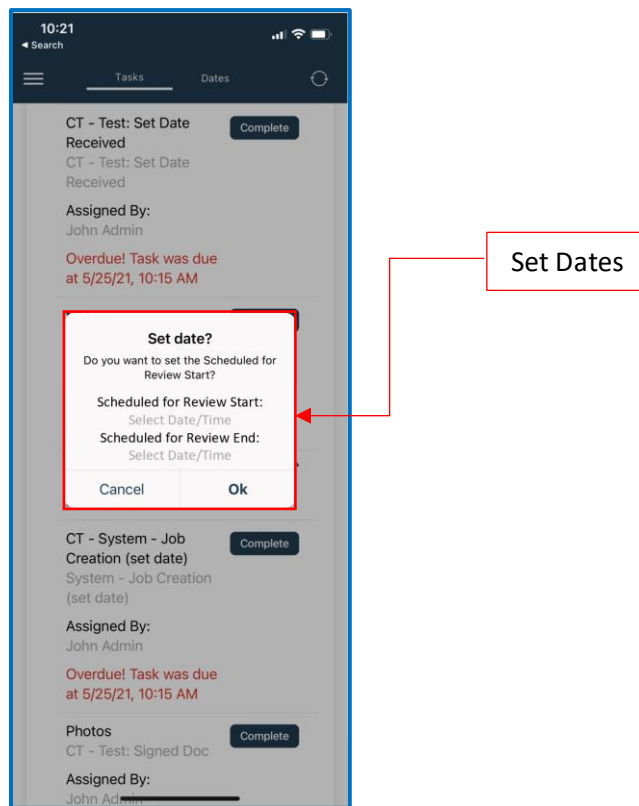

With the correct permissions, Users can 'Send to XactAnalysis' for XactAnalysis Jobs on the Documents and Correspondence Pages.

### 3. Enter Dates – Compliance Template

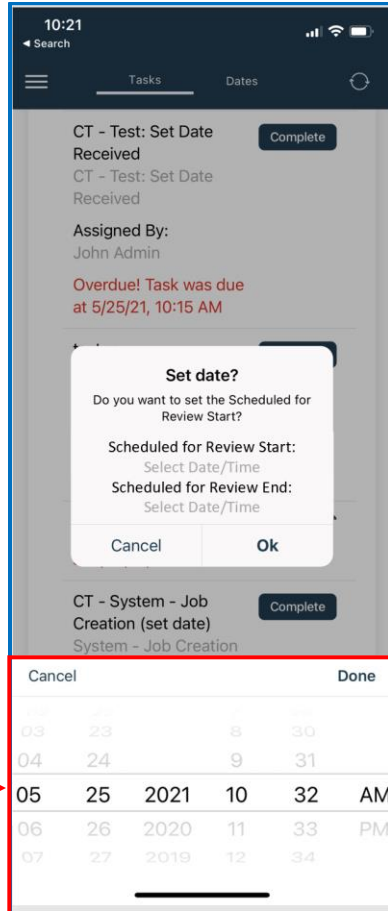

When completing a compliance template task with a set date, Users can manually set complete/end dates for both Target Start and List Review Start. Instead of defaulting to current date and time, Users can set dates for Target Start, Target Complete, List Review Start, and List Review End.

The Start and End Dates for List Date Review and List Date Repair can be set using the calendar and time selection options below.

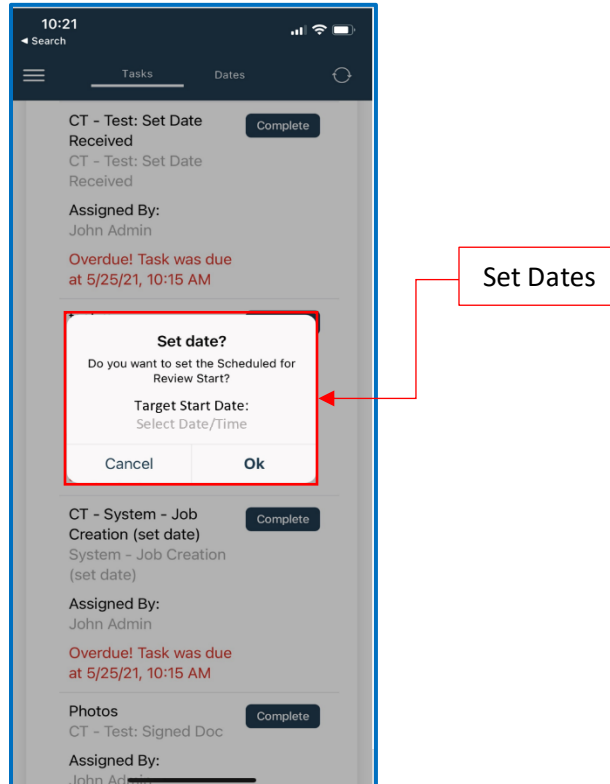

By selecting the grey text, Users can open the Date and Time selection functionality.

Time Selection

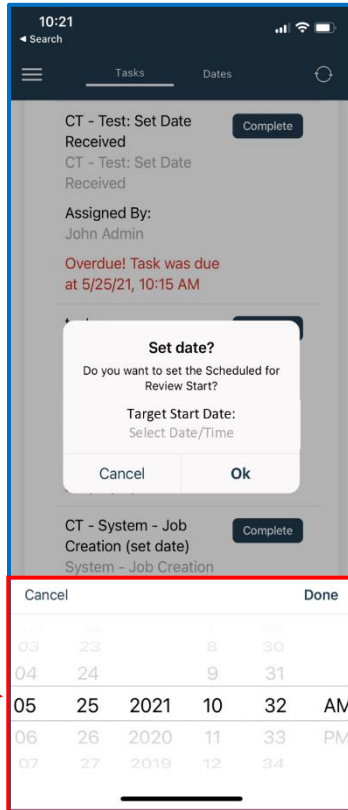

Users must use the “By” field to set the List Date Review date. Users will select “Ok” and proceed to follow compliance task requirements such as custom fields and notes when necessary. Users will set Target Start Date and Target Completion Date using a calendar when compliance tasks are completed.

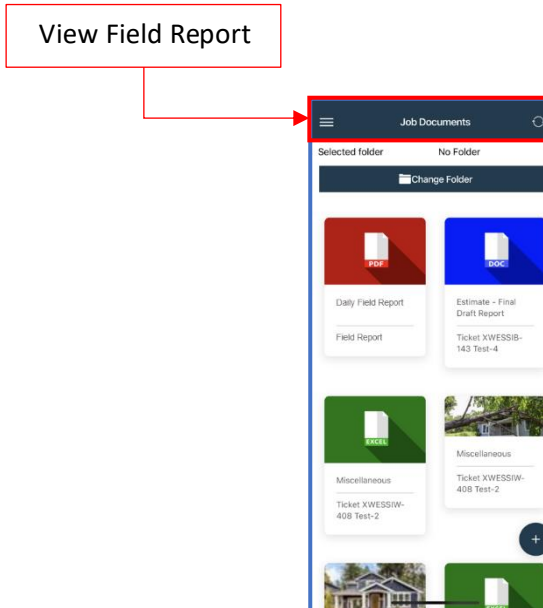

When User selects gray text, the date and time selection functionality will open. Users will select “ok” and proceed to follow compliance task requirements such as custom fields and notes when necessary.

Time Selection

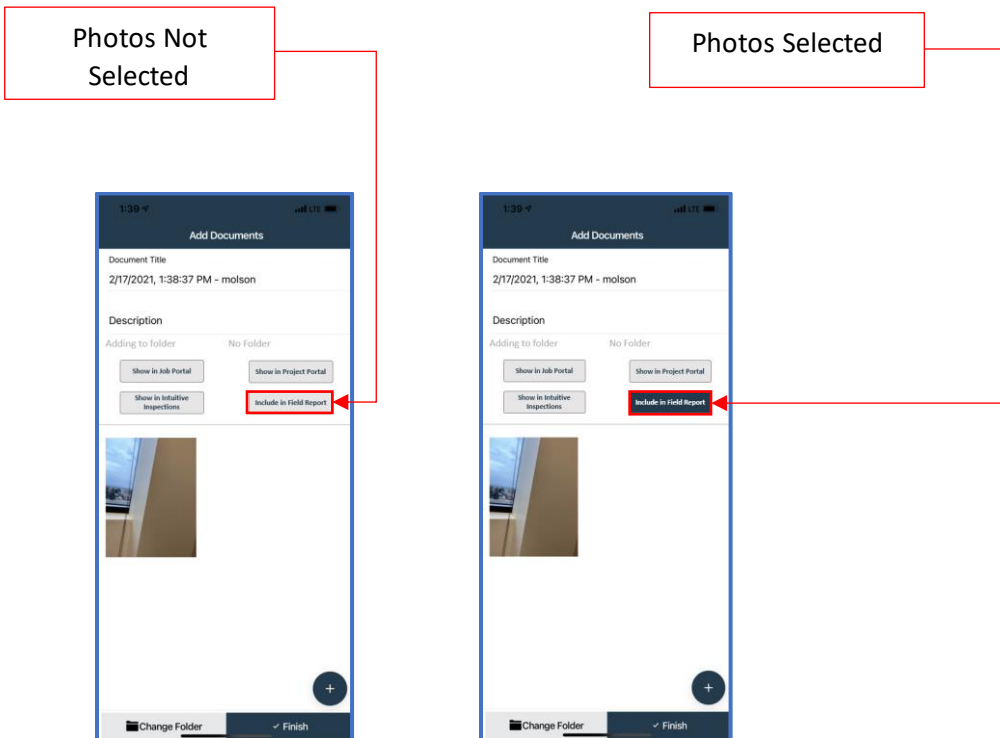

## 4. Add Field Report

We have added the ability to view Field Reports in ManageIt Mobile. Users can select the Field Report in ManageIt Mobile, and a drop-down will display valid Users the report can be emailed to.

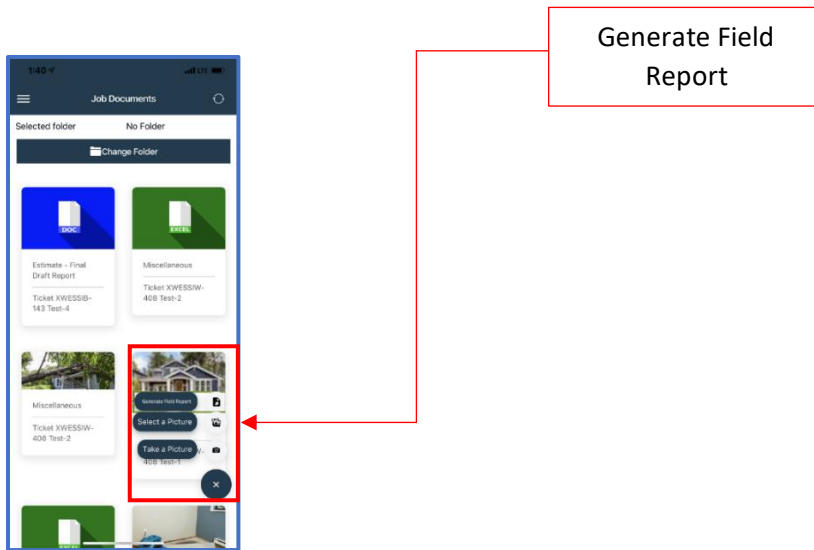

Users can upload photos to ManageIt Mobile and include them in the field report.

Users can generate a Field Report in Managet Mobile using the icon below.

These field reports show the option to save/not save to job docs where the default is to not save to job docs.
