

## Equipment Scanning Third Party Apps

### iPhone/iPad

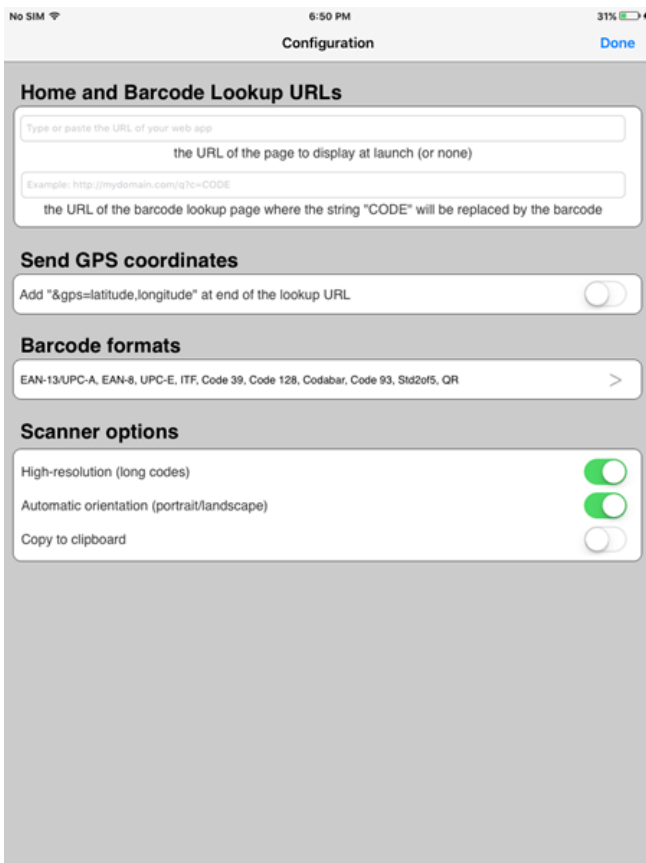

The only compatible mobile scanning application for Apple Products (iPhone or iPad) is **pic2shop PRO – DIY Barcode**, please don't confuse this with the pic2shop the free version it's NOT compatible.

1. Go to the App Store
2. Search for pic2shop ensure you select pic2shop PRO – DIY Barcode
3. Complete the payment and download

### pic2shop PRO - DIY Barcode

Build your own barcode app

Open the pic2shop App and go to the configuration page.

#### Home and Barcode Lookup URLs:

Leave blank – DO NOT apply anything in these fields.

#### Send GPS coordinates:

- Must be off

#### Barcode formats:

- Turn on the High Resolution if you have long or shiny barcodes
- Set the Automatic orientation to on so you can scan a barcode no matter the position of your mobile device
- Set the Copy to Clipboard to off as RM allows you to scan multiple barcodes
